

# WEBINAR SERIES

## WHEN ECONOMETRICS SPEAKS ENVIRONMENT

STARTING FROM  
MARCH 2024

### TOPICS :

**Week 01:**

The Basics of Environmental  
Econometrics.

**Week 02:**

Climate Change Modelling:  
Predictions for Policy

**Week 03:**

Sustainable Development and  
Renewable Energy Economics

**Week 04:**

Labor Markets and Just  
Transition: Green Jobs, Equity,  
and Policy

This is a proposal for a collaborative webinar series titled

---

*“When econometrics speaks environment: investigating  
environmental economics and policy implications for a  
JUST and greener future”*

---

This webinar focuses on the crucial interplay between econometrics and environmental economics and policy in light of the global challenges and in line with the SDGs goals. Where Econometrics offers tools to analyze and forecast the effectiveness of these policies, which is critical for addressing issues such as climate change, resource depletion, and environmental degradation.

This series is a joint initiative between Al-Maktoum College, Dundee Centre of Business Excellence UK and Abou Baker Belkaid University, Algeria, it aims to foster international dialogue, knowledge exchange, and academic enrichment in the vitally important field of environmental policy-making.

### Objectives

- Provide an interdisciplinary platform for the discussion of econometric approaches to environmental issues.
- Discuss recent research findings and policy implications in environmental economics.
- Encourage the implementation of just and sustainable economic policies through informed debate and scholarly interaction.

### Participant Benefits:

- Multidisciplinary perspectives across economics and environmental sciences
- Networking opportunities with global professionals
- Interactive Q&A sessions
- Certificate of Participation upon completion of the series from both universities.
